BTX'S SHINING NEW LEADER FOR DR TRANSITION

Sunny Munro, ARRT, is pictured with one of our newest Viztek DR units - a Samsung DR panel integrated with a Source-Ray SR130. Sunny, our DR Specialist and Trainer, joined BioTech X-ray just two years ago, and was quickly promoted to this position because of her aptitude for technology and her ambition to support our techs company-wide as we upgrade to DR technology.

In September 2012, Sunny trained technologists Tina Cox (Southern IL) and Linda Foster (Central IL) on the use of these new DR units. With these now in the field, we are pleased to report that over two-thirds of our exams are performed using Direct Digital Radiology technology
